Want to get **your technology** in
front of **key decision-makers** at
Ontario Power Generation?

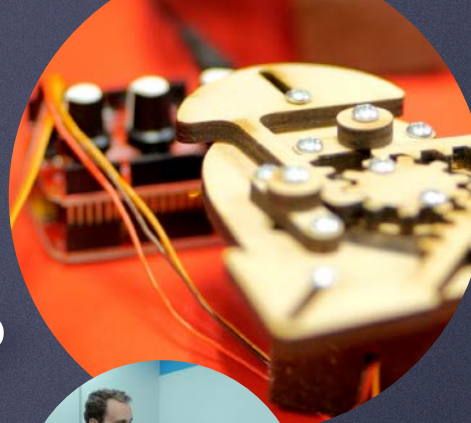

We're looking for **market-ready
groundbreaking** innovations to
showcase to investors, potential
buyers, advisors, and mentors that
can grow your business.

Are you ready to do business with
the largest clean-energy supplier in
Ontario? If you think you've got what
it takes, **apply today** for a chance to
be one of 20 companies invited to
this in-house showcase event.

CALL FOR INNOVATION

Register* at AccessIO.ca

HEY FOUNDERS... ARE YOU IN?

Access IO along with Ontario Power Generation are providing emerging technology companies with an opportunity to get in front of buyers and investors to help fill your business development pipeline.

WHAT WE'RE LOOKING FOR

Artificial Intelligence

- **Large Language Model** – A startup that develops natural language processing technology that enables computers to understand and interpret human language, such as OpenAI's GPT-3.
- **Industrial Computer Vision** – A company specializing in computer vision technology that can be applied in factories or warehouses for quality control or monitoring production processes.
- **Data Analytics** – A startup that develops algorithms and software to analyze large sets of data and provide insights and recommendations for businesses.

Immersive Technologies (VR/AR)

- **Training Solutions** – A startup that creates VR/AR training modules for employees to learn and gain skills in a safe and controlled environment.
- **Productivity** – An app that uses VR/AR technology to visualize and manipulate large sets of data or 3D models of products.
- **Office Meetings** – A startup that develops VR/AR platforms for remote meetings, allowing participants to feel as if they are in the same room together.
- **Visualization of Industrial Spaces** – A company that develops tools to allow people to visualize and explore industrial facilities through VR/AR technology.

Enterprise Solutions

- **Productivity** – An app that automates tasks for businesses, such as managing schedules and tracking expenses.
- **Mobile Solutions** – A startup that creates mobile apps for managing inventory, tracking employees' work hours, or scheduling appointments.
- **Automation of Repetitive Tasks** – A company that develops software bots to automate tasks such as data entry or email responses.

Next Gen Automation/Operational Technology

- **Autonomous Robotics** – A startup that builds robots for automating tasks such as cleaning floors or carrying goods in a warehouse.
- **Drone Technologies** – A company focusing on developing drone solutions for surveying and inspecting hard-to-reach areas.
- **Security** – A startup that develops security software to protect industrial assets from cyber attacks.
- **Industrial Inspection Technologies** – A company that specializes in supplying inspection technologies, such as non-destructive testing, to industrial sectors.

Cybersecurity

- A startup specialized in technologies such as firewall, data encryption, or malware prevention solutions that protect enterprises from cyber attacks.

Submit before August 18

If you fit this list, **apply today** and get ready to do business with the largest clean-energy supplier in Ontario.

Apply at AccessIO.ca/apply

I sincerely thank the Access IO team for the amazing opportunity to present at their event. It not only connected me with interested investors but also led to my nomination and winning of the Jim Flaherty Award from the Abilities Centre. If given the chance to present at Access IO, I would encourage other founders to do so.
